OpenDNS pour aller plus loin dans le filtrage

Qu'est-ce que le filtrage DNS?

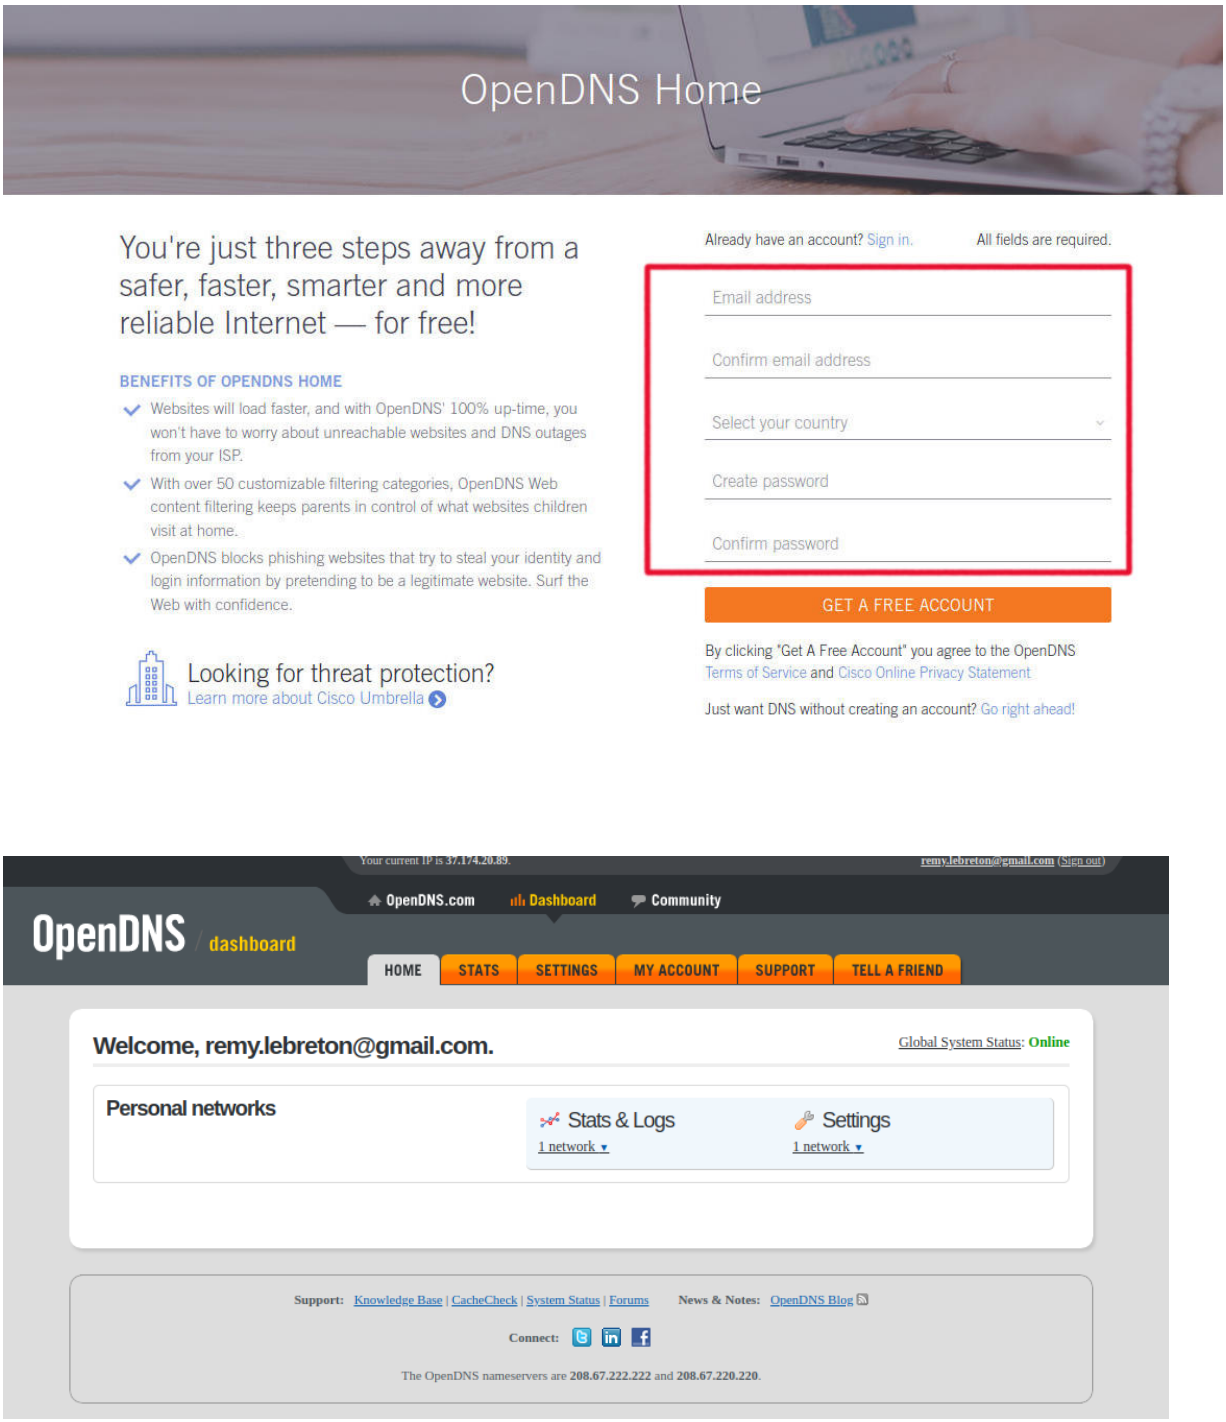

Le filtrage DNS signifie filtrage du système de noms de domaine et est une technique de prevvous empêchant d'accéder à certaines pages Web ou adresses IP qui semblent suspectes. Une fois que vous avez activé un filtre DNS, vous pouvez browse Internet sachant que le filtre sera prevvous empêche de visiter des sites Web malveillants en vous montrant une « page de blocage » qui vous expliquera la cause du problème.revention.

Dynamic IP addresses
OpenDNS supports networks ranging from single IP addresses, dynamic or static, on up to /16. Learn more about dynamic IPs.
Network verification
For individual IP addresses, verification is self-service, if you can click on a link from the network IP address. Networks larger than a single IP address are verified by OpenDNS employees reviewing account info and public records (like whois).

Users can contact you

Your users can contact you directly from the block page if they have questions. It'll show up as an email in your inbox.

Note about DNS forwarding

If you are forwarding requests to OpenDNS, domain blocking may not work properly if the domain's address is in your forwarder's cache.

Check a domain

Find out whether it would be blocked, and why.

Web Content Filtering

Choose your filtering level

- ○ **High** — Protects against all adult-related sites, illegal activity, social networking sites, video sharing sites, and general time-wasters.
  27 categories in this group - View - Customize
- ○ **Moderate** — Protects against all adult-related sites and illegal activity.
  14 categories in this group - View - Customize
- ○ **Low** — Protects against pornography.
  5 categories in this group - View - Customize
- ○ ~~None~~ — Nothing blocked.
- ◉ **Custom** — Choose the categories you want to block.

☐ Academic Fraud	☑ Adult Themes	☐ Advertisements

Manage individual domains

If there are domains you want to make sure are always blocked (or always allowed) regardless of the categories blocked above, you can add them below.

Always block | unexemple.com

ADD DOMAIN

Mise en œuvre

Sur les Box

Gestion du serveur DHCP de la BOX

- modifier les DNS fourni par la box internet

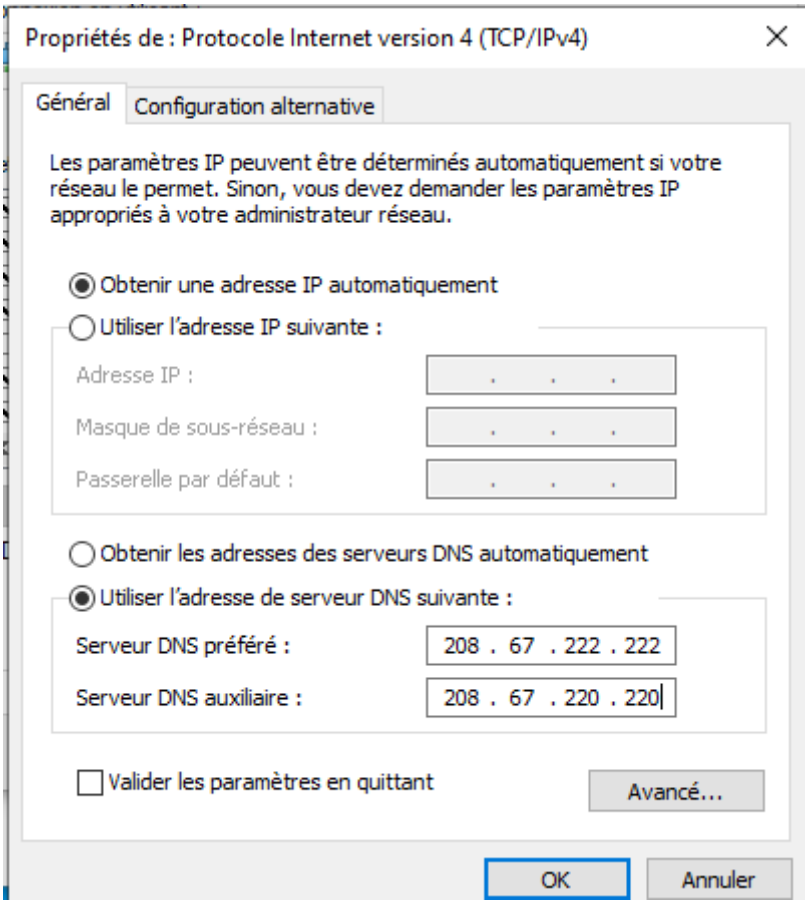

208.67.222.222
208.67.220.220

Pour les utilisateurs de box orange suivant la version il n'est pas possible de modifier le DNS , ceci implique que vous devez modifier manuellement les DNS sur chaque poste de la maison

Sur le poste client Windows ou Linux

Pour les utilisateurs non freebox il faut télécharger le client windows, mac ou linux

Pour les utilisateurs Linux il est nécessaire de configurer ddclient le telecharger ici

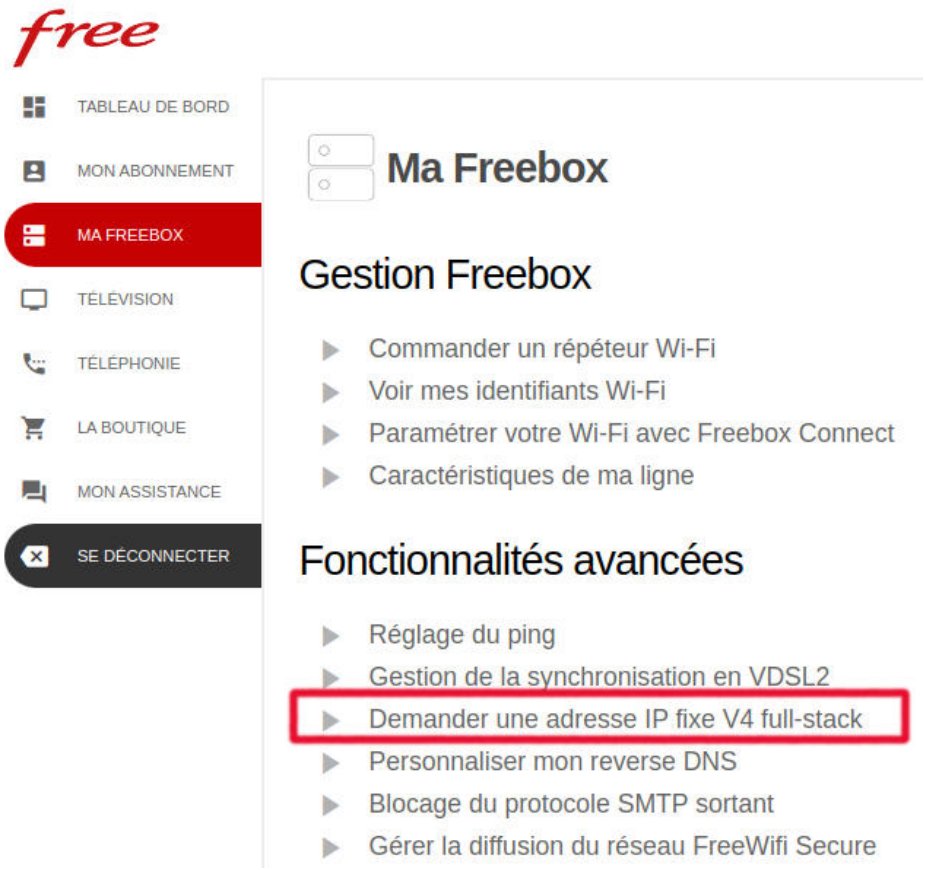

208.67.222.222
208.67.220.220

Redémarrer le poste client

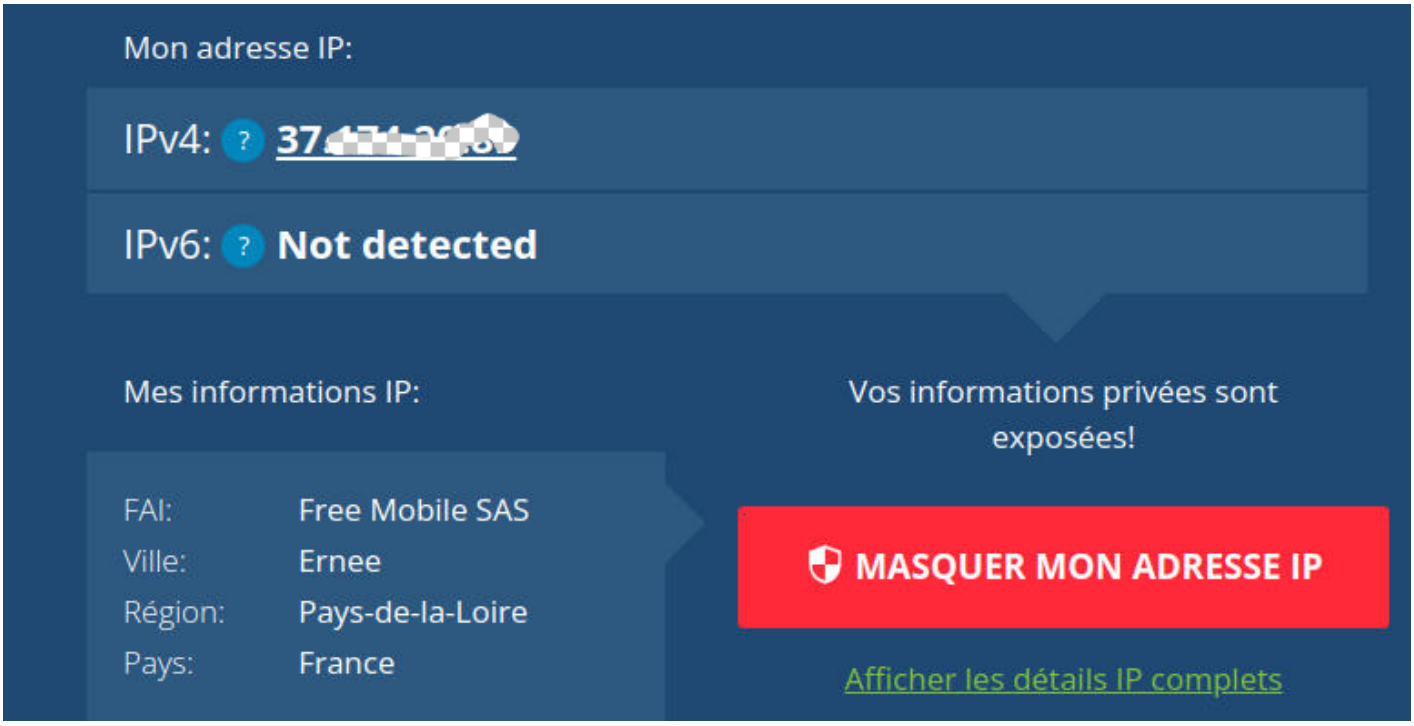

Aide en anglais pour configurer les postes clients et le routeurs connu

https://use.opendns.com/

Pour les utilisateur de box free il n'est pas nécessaire d'installer Opens DNS Dynamic IP Updater
il suffit de fixer l'adresse ip public de la box

https://whatismyipaddress.com/fr/mon-ip

Test sur tinder.com
